

To Whom It May Concern:

This is to confirm that Yakima Chief Hops Supercritical CO2 extraction process:

- Does not contain an irradiation step and no ingredient or processing aid has been irradiated.
- Does not use any ingredient of animal origin nor do our products come in contact with animal products during storage. All products produced are free from Transmissible Spongiform Encephalopathy (TSE) and Bovine Spongiform Encephalopathy (BSE).
- Does not use Melamine as an ingredient, additive or processing aid. YCH does not receive or store material containing Melamine.
- Is a sterile process due to the utilization of CO2 (inert in nature) which acts as an anti-fungal and anti-bacterial agent during the extraction process.

Sincerely,

Hugo Rojas
